

TRINIDAD CEMENT LIMITED

ENVIRONMENTAL POLICY

Trinidad Cement Limited (TCL) affirms its responsibility towards protection of the environment. We are committed to carrying out our business activities in an environmentally responsible and sustainable manner and to minimizing the environmental implications of our activities, products and services.

To meet this Commitment we will:

- + Actively pursue a policy of pollution prevention.
- + Fulfil the organization's compliance obligations.
- + Make strategic efforts to lower our carbon intensity, reduce emissions and manage our water consumption and waste.
- + Promote biodiversity and maximize our contribution to nature conservation.
- + Maintain open and effective communication channels with our employees, contractors, customers, the community and all those who work with us.
- + Provide the necessary resources for training and supervision to appropriately manage the environmental aspects of our operations.
- + Plan, review and assess our environmental performance against measurable targets and industry best practices to drive continual improvement.
- + Investigate, monitor and report on our environmental performance.

The TCL Environmental Management System drives a systematic approach to environmental management into our operations to achieve continual improvement and enhance our environmental performance.
